

Sprint Plan 8

Week 7: 12 June - 19 June

User Story	Tasks	Assigned To	Estimated Effort	Priority
The user would like for his tracks to be mixed like a real DJ would.	Onset detection integration with beat matching	Emiel/Davey	5 hours	High
	Energy level integration with score.	Emiel/Roy	15 hours	High
	Use energy levels to determine when to start next track	Emiel/Davey	10 hours	High
As a new team member joining the team. I would quickly understand the source code and be able to work with it.	Refactoring code.	All	30 hours	Medium
As a user, I would be able to interact with the GUI without triggering exceptions in the controllers.	Test Controllers package more thoroughly.	Felix	20 hours	High
As an external party, I would like to understand the vision behind this project.	Create draft for Final Report	All	20 hours	High
As a user who prefers the GUI over the CLI, I would like an intuitive, easy to use Interface that I can understand immediately.	Restyling GUI according to its features	Davey	15 hours	Medium
